RE: 2022 YBSD User Rate Increase

All,

For the first time in **over 20 years**, the YBSD has increased wastewater rates by 5%, with an effective starting date of July 1, 2022. This rate adjustment will help the YBSD fund upgrades to existing core infrastructure as well as fund investments in new infrastructure. These infrastructure investments will help the YBSD maintain stable and uninterrupted service to its users as the community continues to grow within the YBSD service area. For the average household, this 5% increase represents **less than** \$23 per year.

Thank you,

Cyrus W. McMains, PE
Executive Director
